15:15 - 15:30	**Coffee break**
15:30- 17:00	**Dilemma game - interactive session with the audience**

Academic Integrity: Concepts and Practice

Lecture by **Michelle Bergadaà**

We are living through a period of transformation on an unprecedented scale, in which artificial intelligence (AI)—beyond its technological innovation—is emerging—and being imposed—as a phenomenon that is profoundly reshaping the very structures of our society. The academic world, the cornerstone of knowledge production and dissemination, has been particularly affected. Indeed, the new dynamics reshaping academic practices challenge the values on which scientific legitimacy is based. The presentation will focus on two key issues:

1/ We will first define how to translate academic values into foundational and regulatory standards. We will present a model that doctoral students and their advisors can easily understand.

2/ Next, we will propose a structured approach to countering the misconduct of certain individuals: how to identify different profiles of integrity offenders to provide a response tailored to each.

Michelle Bergadaà, professor emeritus at the University of Geneva, Switzerland. She is president of the International Institute for Research and Action on Fraud and Plagiarism in Academia (IRAFPA), which she founded in 2016 with Paulo Peixoto, vice-rector of the University of Coimbra (Portugal). Today, more than 20,000 people are subscribed to the IRAFPA newsletter, and more than 8,000 follow the organization on LinkedIn.

Michelle Bergadaà completed her MBA and went on to obtain her PhD in Montreal. She published over 150 articles in her field before turning her attention to the science of integrity in 2004. Two of her ten books are frequently cited in the field of integrity studies: *Academic Plagiarism: Understanding It to Take Responsible Action*, Globethics Higher Education Series - Research Ethics, 2021 and *L'intégrité académique – du concept à l'action*, EMS, 2026.

DATE	10/09/2026
VENUE	CITY CENTER, L3-L5 BUILDING, RUE DE PITTEURS 18-20 (4000 LIÈGE)
REGISTRATION	VIA ULIS WEB

Places are limited – Early registration recommended
